

RO Number: 15185

Inspection Number: 3289542

Year: 2025

Insurance: STATE FARM INSURANCE COMPANIES

Make: Toyota

Model: RAV4 XLE AWD

VIN: 2T3P1RFV5SW619629

Estimator: Mccunn, Blair

IMPORTANT! Please validate vehicle is equipped with listed ADAS system components by performing a visual inspection!

Scanning Requirements

PRE AND POST SCAN REQUIRED

<https://opusbroker.blob.core.windows.net/adasmapinfo/Toyota/TS-CRIB-191-D.pdf>

Per Toyota CRIB 191: "Repairers should perform a "Health Check" diagnostic scan since a capable scan tool is the only way to identify and document DTCs. It is necessary for repairers perform a "Health Check" diagnostic scan before and after every repair if a vehicle has sustained damage as a result of a collision." In addition: "Toyota, Lexus, and Scion vehicle electrical systems are designed to control and communicate with engine, drivetrain, body electrical, navigation, audio, handling and safety systems." Components from these various systems can be damaged in a collision and may not necessarily cause a MIL. The Toyota CRIB also states that the pre-repair system scan will help to identify DTCs that will need to be taken care of to help ensure the systems operate correctly.

Identified ADAS Related Services to be Performed

Based on the estimate, the following calibrations/initializations have been identified:

- ADAS L3: Static Calibration - A (1)
- Seat Belt Inspection (1)
- Seat Related Calibration (1)

Calibrations

<u>ADAS System/Components</u>	<u>Location</u>	<u>Calibration</u>
Adaptive Cruise Control		
Millimeter Wave Radar Sensor	Front Bumper	ADAS L3: Static Calibration - A

Calibrate the front Millimeter Wave Radar Sensor if any of the following apply:

- Front bumper cover is damaged or deformed (e.g., due to an accident)
- Sensor installation has been altered, loosened, removed, or replaced
- Radar sensor bracket has been removed or replaced
- Grille replacement
- The bumper installation area on the body is repaired

Radar Inspection:

- Inspect the radar sensor housing for signs of impact
- Replace the sensor if any impact marks or damage are found

Pre-Calibration Prep:

- Remove any excess weight from the vehicle
- Verify and set correct tire pressures

Calibration Method:

- Dynamic calibration is available without targets if the user does not have ADAS targets
- ADAS targets are required for if calibration is done in a static state.

Occupant Detection

Occupant Classification System

Passenger Seat

Seat Related Calibration

Important! Check for DTC before performing calibration!

Perform a DTC Read and Clear procedure on the system and complete a physical inspection if:

- Vehicle Involved in a collision.

If vehicle was not involved in a collision, perform a DTC check and clear on the system.

Follow diagnostic procedures if faults are found in the system.

If physical inspection is done, visually inspect the occupant detection for defects and check for the following:

- Cracks in the ECU housing
- Dents in the ECU housing
- Chips in the ECU housing
- Cracks or other damage to the connector
- Damage to the serial number label

If any defects are found, replace the component with a new one.

Perform a Zero Point Calibration if:

- Occupant detection ECU is replaced.
- Front passenger seat is removed and reinstalled.
- Front passenger seat bolts are removed and reinstalled.
- Passenger airbag ON/OFF indicator stays on when empty.
- Occupant classification sensor collision detection DTC is present due to an accident/collision.
- Vehicle is brought to a workshop for repair due to an accident or collision.

No seat weights are required for calibration.

Seat Belt Inspection

Seat Belt

Interior

Seat Belt Inspection

Seatbelts must be inspected after a collision to ensure passenger safety even if the airbags have not deployed.

Identified ADAS Systems

<u>System</u>	<u>Component</u>	<u>Location</u>
Adaptive Cruise Control	Millimeter Wave Radar Sensor	Front Bumper
Backup Cameras	Rear Television Camera	Trunk Lid
Blind Spot Monitoring Systems	Blind Spot Monitor Sensor - Rear	Rear Quarter Panels
Lane Departure / Keep Systems	Forward Recognition Camera	Windshield
Occupant Detection	Occupant Classification System	Passenger Seat
Seat Belt Inspection	Seat Belt	Interior
Steering Angle Sensor	Steering Angle Sensor	Column
